Sturgeon School Division serves the needs of 5,000 students in 16 schools throughout Sturgeon County. Our vision is to provide a well-rounded education so that students are motivated and supported to pursue their unique path to future success. For more information, visit www.sturgeon.ab.ca

Redwater School

"...making a difference!"

An outstanding education in a trusted, welcoming environment, Redwater School serves students in grades 5 through 12. Staff at Redwater work hard to meet the diverse needs of students through differentiated instruction and programming. The school has one of Alberta's highest graduation rates and is highly ranked in The Fraser Report, which evaluates high schools throughout the province.

Redwater School has a strong academic program and offers many exciting options through career and technology studies (CTS) courses and a full fine arts program of music, art and drama. Sports and extracurricular programs are also a continuing priority. As a smaller school, Redwater students have a great opportunity to participate in a variety of activities. The school offers smaller classes where students get the individual attention they need, and parents and teachers are able to maintain a close working relationship.

Opportunities for students are also available through work experience and the Registered Apprenticeship Program, which allows students to embark on a career path while continuing their high school program. Redwater School also offers the exciting Green Certificate Program for students interested in agriculture.

The community of Redwater also actively supports students through a variety of scholarships to post-secondary institutions. In our small school setting, students have a greater opportunity to access and qualify for awards and scholarships. At Redwater School, staff and students are "making a difference."
